This *New User (Basic)* search form allows for searching of the most commonly searched fields: word marks, serial or registration numbers, and owners.

The **Combined Word Mark** is the default search field and includes the **word mark** and **translation**.

Use the \$ for truncation in any field. For **Combined Word Mark** searches, the * is a more efficient truncation operator for left and/or right truncation. For example, the search term ***DOG*** with the **Combined Word Mark** will retrieve marks with common variations of the word DOG in the word mark or translation statements. Use of the \$ truncation operator sometimes results in a truncated hit list.

For serial number or registration number searches, enter the 8-digit serial number (e.g. 75123456) or 7-digit registration number (e.g., 1234567) and select **Serial or Registration Number** as the *Field* for the search. If multiple serial or registration numbers are searched, separate the numbers by spaces and change the *Results Must Contain* value to Any Search Terms (OR). (Alternatively, separate the number by the Boolean OR operator without adjusting the *Result Must Contain* value.)

Do **NOT** include the apostrophe for contractions. For example, search for the word **DON'T** by searching **DON T**. Including Boolean operators (e.g., AND, OR, NOT) or proximity operators (e.g., ADJ, NEAR, SAME, WITH) in your search will override the *Result Must Contain* setting for the search. To actually search for these Boolean or proximity operators, include quotes around the operator.
